

Clysar® Bakery Shrink Films

Precise Air/Heat Evacuation for Packaging Retail Baked Goods

Clysar® HPG-BP bakery film is a high-performance film technology custom-tailored to the specific needs of packaging sweet baked goods.

It's a more advanced, efficient way to keep your baked goods looking and tasting fresh from your ovens to the retail shelf:

- **Evacuates Heat/Air:** Pre-perforated films offer precise heat and air evacuation to allow optimal cooling
- **Locks in Freshness:** Micro-perforations control exposure to moisture and air to maintain freshness throughout distribution
- **Shrinks Beautifully:** Crystal clear polyolefin films shrink tightly and evenly around bulk bakery trays for a clean, appetizing presentation
- **Runs Flawlessly:** Engineered to run on existing shrink equipment for excellent productivity with minimal waste
- **Bakery Films** also available in recyclable* options

TECHNICAL SUPPORT FROM TRIAL TO COMMERCIALIZATION

Transitioning to Clysar's high-performance bakery shrink films is easy with the help of our expert nationwide distributor network and field tech reps. You'll get assistance throughout trial and commercialization to create a successful package. Contact [888-4-CLYSAR](tel:888-4-CLYSAR) to learn more.

Uncompromising Quality for a Better Bakery Package

Clysar® bakery shrink films are made to FSSC 22000, ISO 9001:2015 and FDA/USDA standards to assure they meet and exceed your need for safe, reliable bakery packaging quality. Featuring industry-leading clarity, gloss and consistency, Clysar® films are proudly made in the USA.

Ideal For:

- Cakes
- Cookies
- Donuts
- Cupcakes
- Pastries

Reduce Material 40% Compared to Polyethylene

At just 45 gauge, strong, lightweight Clysar® bakery films deliver exceptional source reduction, productivity and aesthetics compared to polyethylene shrink films.

- Use up to 40% less material
- Shrink tighter with better clarity to showcase bakery
- Run at higher speeds with fewer changeovers

Polyethylene Shrink Film
